Controlled Environment Systems

WE LEVERAGE OUR LOCAL ROOTS TO ACHIEVE INTERNATIONAL REACH

Founded in 1978, **Plasteurop** has been the commercial brand of **Panelco SAS** since 2004. Our 15,000 m² production site is located in Vonnas, Ain (01).

Our core business is the design and manufacture of enclosures for cleanrooms and critical environments.

We supply complete building systems: **partition panels**, **ceiling panels**, **doors**, **vision panels** and other **assembly accessories**.

In 2022, the company became part of **G-CON Manufacturing**, a Texas-based specialist in prefabricated cleanrooms. This acquisition gives us a second production site in the USA and strengthens our international presence.

Our products are now marketed in North America under the **GCS** (G-CON Clean Solutions) brand.

OUR SOLUTIONS GUARANTEE THE CRITICAL ENVIRONMENTS ESSENTIAL TO TECHNOLOGICAL INNOVATION

In an ever-changing world, the creation and maintenance of critical environments with controlled atmospheres are imperative to support innovation.

Whether it's to preserve air purity in **clean rooms**, control humidity in **dry rooms**, protect sensitive **data center** infrastructures, ensure **fire resistance** or optimize **acoustic comfort**, we design envelopes to meet the most stringent requirements.

CLEAN ROOMS

Life sciences, cosmetics, microelectronics, space and aeronautics industries

DATA CENTERS

Hyperscale data centers, server rooms and IT infrastructures, medical data hosts

DRY ROOMS

Batteries, gigafactories, pharmaceuticals and chemicals

ACOUSTIC

Recording studios, open spaces and offices, technical rooms, conference rooms and auditoriums

FIRE-RATED

Chemical industries, datacenters and computer rooms, public buildings, industrial warehouses

**MUCH MORE
THAN PRODUCTS,**

**A COMPLETE
CONSTRUCTION
SOLUTION**

DOORS

Whether pivoting, sliding or equipped with an inflatable seal for containment, the Plasteurop door range ensures accessibility and safety in your critical environments.

Designed and manufactured to the highest quality standards, they represent a reliable and efficient solution for a wide range of applications.

Disponibles en simple ou double vantaux, Available in single or double leaf, solid or glazed models, the possibilities are vast to provide you with optimum flexibility of use and aesthetic appeal.

PANELS

Our standard panels offer quick and easy installation, while our special panels cover all your project's specific needs.

Our complete range of panels is designed to meet all current standards.

When used in partition walls or ceilings, our products are adapted to all environments and constraints.

VISION PANELS

Glazing is an essential element for adding a touch of light and openness to your environment.

They offer harmonious, functional integration for your interior partitions.

ASSEMBLY ACCESSORIES

Our range of accessories includes the essential elements for mounting all wall and ceiling panels.

All these solutions have been designed to facilitate installation and enhance the functionality of your spaces.

EXPERTISE BUILT UP OVER THE YEARS

PLASTEUP
GCS

WHY WORK WITH US?

RAW MATERIALS SELECTED IN FRANCE AND EUROPE

From the outset, Plasteurop has been a **French manufacturer** favouring **French (55%)** and **European (40%)** components in its processes.

This choice gives us greater **control** over the **quality** of our products and helps **reduce our carbon footprint**.

A CAREFULLY SELECTED NETWORK OF INSTALLERS

Plasteurop is the only company in our market to be an **exclusive manufacturer**.

Our systems are installed by a network of local partners who are **highly qualified** across the globe for their quality, experience and reliability.

CERTIFIED PRODUCT RANGES

Because reliability, quality and safety are not optional extras in our industries, our product ranges are regularly **tested** and **certified**, guaranteeing their compliance with the most stringent standards and regulations.

CUSTOMER FOCUS

With **over 45 years' experience**, Plasteurop develops and manufactures products in close collaboration with its customers.

The sales department, in association with our Research and Development team, **advises you** on the development of your projects and **supports you** throughout the process, from the initial design to the actual implementation of your technical studies and the delivery of tailor-made solutions.

OUR COMMITMENT TO REDUCING OUR CARBON FOOTPRINT

At Plasteurop, our commitment to a **sustainable future** is reflected in every aspect of our manufacturing process. We source **carbon-free steel** from suppliers who share our vision for a greener world.

This partnership reinforces our commitment to **reducing our carbon footprint** and providing environmentally-friendly solutions for our customers.

FOCUS ON OUR COMMITMENT TO REDUCING OUR CARBON FOOTPRINT

The efforts that enable us to make progress
year after year...

ENVIRONMENTAL PRODUCT DECLARATIONS

EPDs are available for all our core products, guaranteeing full traceability of their environmental impact.

These declarations make it possible to measure precisely the CO2 emissions and other impacts associated with each stage in the life cycle of our products.

THE RECYCLABILITY OF OUR RAW MATERIALS

We limit the use of non-renewable resources in the manufacture of our honeycomb panels, which are composed of over 95% recyclable materials.

SOURCING FROM SUPPLIERS WHO SHARE OUR VISION

Our steel supplier ArcelorMittal enables us to reduce our CO2 emissions in 2 ways:

- XCarb® Steel Certificate
Offsets up to 2 tonnes of CO2 per tonne of standard steel via carbon credits (scope 3).
- XCarb® RRP (Recycled and Reduced CO2)
Steel made from recycled materials and green electricity, reducing direct emissions to just 1 tonne of CO2 per tonne produced.

CONCRETE IN-HOUSE ACTIONS

- Electrification of fleet
- Organization of collective cleaning time
- Participation in carbon offsetting programs integrated into business trips
- Reusable equipment and supplies provided to employees
